NATURAL RESOURCES
Natural Resources are resources that exist without actions of humankind. This includes all natural characteristics such as magnetic, gravitational, elemental properties and forces etc. On earth it includes: Sunlight, atmosphere, water, land, minerals along with all ecosystems, flora and animal life that naturally sustain upon or within the homeforce biological characteristics and substances. They are the materials and components that can be found within the environment. Living mammals praised to composed of natural resources. A natural resource may exist as a separate entity such as fresh water, air and as well as living organism such as fish. Or it may exist in an alternate form that must be processed to obtain the resource such as metal ores, rare earth metals, petroleum, and most forms of energy.
TRUTH IS THE LIGHT OF THINGS.
